Professional Summary

BSIT student with hands-on experience in web development, database systems, and technical troubleshooting. Demonstrates strong adaptability, teamwork, and efficient development practices. Committed to building functional, user-friendly applications and continuously improving technical skills.

Technical Skills

- Coding & Development: HTML, CSS, Java, MySQL
- UI/UX Design: Responsive layouts, clean interface design
- Database: CRUD operations, ERDs, data modeling
- Networking: Crossover cabling, PC-to-PC sharing, basic LAN setup
- Troubleshooting: Hardware & software diagnostics

Soft Skills

- Teamwork & Collaboration
- Adaptability & Willingness to Learn
- Problem-Solving
- Communication
- Attention to Detail

Project Showcase

Inventory Management System – Final Project (2024)

- Developed a simple inventory management system with CRUD functionalities.
- Designed structured database tables and created system documentation.

Portfolio Website – Independent Project (2023)

- Built a personal HTML/CSS portfolio to showcase projects and skills.
- Applied responsive design and clean UI layouts.

Networking Lab Activities – Student (2nd Year)

- Performed crossover cabling and PC-to-PC network configuration.
- Applied IP addressing, connectivity testing, and basic LAN troubleshooting.

Java Dream House Graphics Project – Developer (1st Year)

- Created a graphical “dream house” using Java GUI and graphics.
- Practiced OOP concepts, shape rendering, and coordinate-based design.

Education

Filamer Christian University — BS in Information Technology (2027)
